

Gauntlet Certification Report

Battery: **discrimination** | 30 generated test days | seed 0 | generated 2026-06-13 12:30

Each day is a generated stress scenario chosen for recoverable money at stake (do-nothing cost minus a perfect-foresight oracle) and for separating competent agents from naive ones. Every worker is scored as the share of the recoverable loss it recovers, bracketed between the oracle (100%) and doing nothing (0%). Deterministic workers are averaged over Monte-Carlo jitter per day; real model workers (Claude, the DeepSeek personas) are a single run per day (API-bound) and labelled as such. Pass-rate is the share of days scoring at least 50%; worst-case P10 is the tenth-percentile day, the tail behind the average.

Certification report

Worker	Kind	Pass-rate	Worst P10	Mean	Hardest day (score)
Do nothing	baseline	0%	0%	0%	under-forecast sun (Zaragoza, midday) + under-forecast sun (Zaragoza, afternoon) (0%)
Rule-based	rules	13%	0%	16%	under-forecast sun (Zaragoza, midday) + under-forecast sun (Zaragoza, afternoon) (0%)
Reference agent	reference	37%	20%	47%	missed cloud bank (Zaragoza, afternoon) (7%)
Claude Sonnet	claude	27%	2%	34%	silent fault (Valencia 33%, 16:15) + under-forecast sun (Munich, afternoon) + under-forecast sun (Zaragoza, midday) on a high-evening-price day (0%)
Cautious	persona	30%	12%	37%	silent fault (Valencia 33%, 16:15) + under-forecast sun (Munich, afternoon) + under-forecast sun (Zaragoza, midday) on a high-evening-price day (0%)
Balanced	persona	37%	9%	39%	missed cloud bank (Zaragoza, afternoon) (0%)
Aggressive	persona	33%	0%	37%	silent fault (Valencia 33%, 16:15) + under-forecast sun (Munich, afternoon) + under-forecast sun (Zaragoza, midday) on a high-evening-price day (0%)
